Chizoba Ononlememen

Software Engineer || ML Engineer || Technical Writer
Nigeria

Experience

eTranzact PLC
Software Developer
April 2025 - Present (5 months)

WAGMI DAO

Social media Manager and Content Writer
June 2024 - Present (1 year 3 months)

Manages the social media pages for WAGMI DAO and creates their content

Open source contribution

Technical Writer
June 2023 - August 2024 (1 year 3 months)

- I improved the documentation for a Codebooker project by rewriting the documentation with clear guidelines, instructions, code snippets, and graphics for utilizing the project's API and developing the project.

- I deployed and configured a TSDocs tool for a Google/labs prototype project that ran on a TypeScript commented code to successfully generate its documentation.

- Worked on a Bored API project that suggests activities to do for fun, and used Stoplight.io to write its documentation and document its endpoints.

- Built a basic API using Node JS and MongoDB to give me an in-depth understanding of how API works, and to better understand how to document it properly for users.

- I contributed my documentation skills to a Pretashop Docs project, where I worked on improving their documentation for better user understanding and readability, fixed typos and grammatical blunders in the docs.

- I developed an OpenAPI specification (OAS) based on the TMDB movie API reference documentation. This OAS enables users to easily retrieve movie

names, IDs, and curl requests using just a keyword. It offers a user-friendly experience and provides a try-it-out experience for users.

- Worked on deploying live the Github pages of an open-source project's documentation, utilizing Jekyll tool for streamlined content management and presentation.

Herald Sheets

Web3 Content Writer

September 2022 - February 2023 (6 months)

- Authored and published more than 600 high-quality articles on technical subjects.

- Demonstrated expertise in boosting website traffic and article reviews through effective SEO strategies, company saw more engagements on their posts.

- Proficiently oversaw content editing processes to ensure consistent quality.

Education

University of Lagos

Bsc, Systems Engineering · (2019 - 2025)
